

The Barrel Gauge

123752
123753

Ideal For Standing Barrels

Please specify tank size and tank opening dimension when ordering

Our Barrel Gauge is specifically designed for use in a wide variety of standing barrels. Direct mechanical action, reliable construction and easy readability make this gauge a perfect choice for barrel volume measurement.

- Patented calibration assembly withstands pressure of 70 lbs. per sq. inch.
- Double plastic dome is almost indestructible.
- For use in 55, 30, or 15 gallon barrels.
- Gauge reads in "gallons," "liters," and volume percentage.
- All "internal tank" parts available in stainless steel.
- Repair parts available.
