## Instructions For Using The Super Sweep Net

---

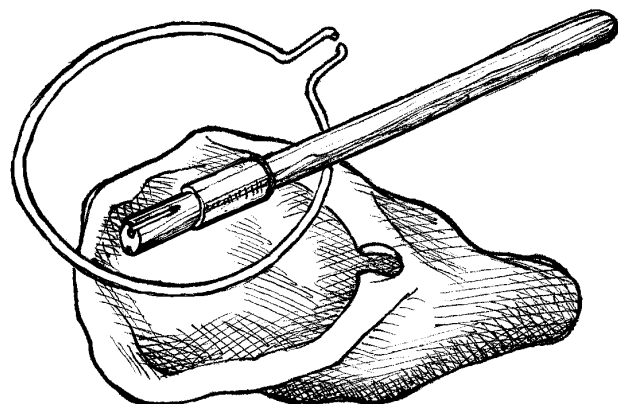

### Materials included:

- A) One 15" diameter hoop
- B) One 15" sailcloth net bag
- C) One 35½" wood handle w/ collar

### How to Assemble:

Grasp the metal hoop with the open end facing up. Thread the sailcloth net bag onto the hoop. The bag will pull on easily at first. However, when it resists, press down on the side of the metal hoop you've started with the bag and continue to pull the bag onto the hoop. This task will take firm pressure to force the hoop downward. Continue to pull the bag until it is entirely threaded around the hoop.

Next, pick up the wood handle and press the release button on the metal collar. Pull the metal collar down until it rests below the button. Insert the open end of the hoop into the holes in the handle. Pull the metal collar up past the release button until it locks in place. Your Super Sweep Net is now fully assembled.

### How to Use:

Using a sweep net is a good way to find out if you have enough insect pests to justify a control measure. These pests include alfalfa weevils, caterpillars, aphids, armyworms, leafhoppers, stink bugs, plant bugs, flea beetles, potato beetles and many others.

To use a sweep net, swing the net from side to side in a full 180 degree arc. Tilt the net opening so that the lower edge of the rim is slightly ahead of the upper rim to catch insects as they fall from the plants. Specific sampling procedures and economic thresholds for your area and crop can be obtained from your County Extension Agent.
