

# Plant Trees...

# Anytime, Anywhere.

## Ooze Tube® Features:

- Typical configuration drips 3 weeks
- Low profile; Works with multi-stems & conifers
- Water weaning – teaches tree to live on its own!
- Dramatically reduces warranty replacements
- Low cost, re-useable and repairable
- Readily adaptable to remote installation.
- Available in 3 sizes: 25, 35 and 45 gallons!
- Allows air circulation from stem to soil
- Reduces hand watering labor by two thirds +

OT25-C (Chocolate)

146914 is in 15 gallon for the average consumer.

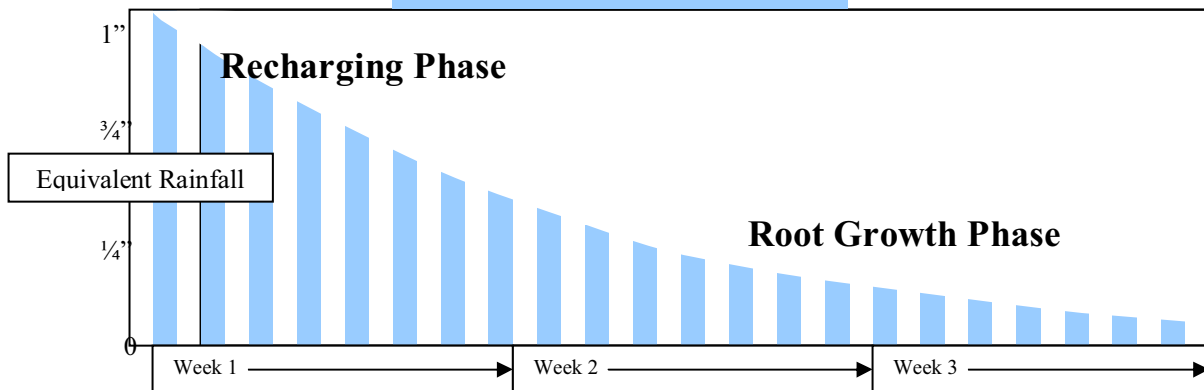

OT25-T (Tan)

## Work Smarter – Not Harder!

The Ooze Tube® *does* cost less than a TreeGator® but, it is NOT a cheap Gator knockoff! Designed by an ISA Certified Arborist, the Ooze Tube is uniquely engineered for establishing trees as quickly and as cost effectively as possible.

# Setup Information

**Step 1:** Your Ooze Tube<sup>®</sup> comes rolled on a stake; everything you need is included in a nice small package.

**Step 2:** With the fill holes pointed up, wrap your Ooze Tube<sup>®</sup> around the tree in a “closed C” pattern.

**Step 3:** Lace both end flaps together by threading the wooden stake through the 6 horizontal slots cut into each flap.

**Step 4:** Drive the stake in the ground on the “high side” of the tree, about 1 ½ feet from the trunk.

**Step 5:** Fill with water.

**6a.** Insert Nail close to soil level

**6b.** Remove Nail – water flows to help locate hole

**6c.** Snap Emitter(s) into position

No. of Emitters	1	2	3	4
Drip Time (Aprox.)	1 Month +	2-3 Weeks	10 Days	5 Days
Tree Caliper	Up to 2 ½”	3”	4”	5”
