

## Shoulder-length Best<sup>®</sup> Neoprene

### Best Manufacturing Company

579 Edison Street

P.O. Box 8

Menlo, GA 30731-0008

When it comes to jobs that require expanded and extended protection, Best's shoulder-length offerings in multi-dipped, liquid-proof Neoprene and Nitrile are tough to beat. Created for demanding applications involving a wide array of chemicals and caustics, Best's shoulder-length hand protection is ideal for chemical manufacturers, labs and pollution control workplaces. Specifically, these gloves are designed for applications where handling drums and large-volume containers of chemicals and solvents are commonplace. Unlike the competition, Best's shoulder-length hand protection is designed for maximum comfort with ergonomically designed sleeves that contour to the arm and shoulder joint. The cotton flannel lining translates into long wearing comfort too. Best's shoulder-length Neoprene and Nitrile gloves are the glove of choice for specialized chemical applications.

#### Shoulder-length Neoprene

| Size  | Part Number | Features              |
|-------|-------------|-----------------------|
