To calibrate Alley Cat wipers use the chart above
(Example for one 36" inch row middle wiper)

One 36" inch wiper has a total of 6 orifices.

The number on the orifice is # 14

The PSI is 20 PSI.

.018 is the gallons per minute per orifice.

$.018 \times 6 = .108$

One 36" inch wiper will use up .108 gallons per minute

For more information call
1-800-764-9596

**ALLEY CAT WEED WIPERS
ELIMINATES HERBICIDE DRIFT
AND SAVES MONEY**

works with glyphosate

Row middle wipers simply clamp
onto a 1 inch pipe. This allows
our wipers to adapt to your ex-
isting herbicide equipment. Your
liquid feed hose plugs right onto
our wiper boom. Its that easy.
