

2 Great Ice Melters

Premiere Pro® Ice Melter with Protector SL®

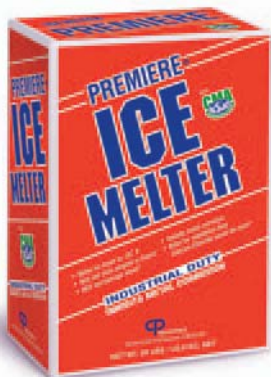

Melts to
-20°F/-29°C

- Patented Synergistic Formula
- Safer for Concrete & Metal
- Creates Instant Traction
- Vegetation Enhancer & Protectors
- Colored for Controlled Application
- Contains Anti-Caking Agents
- Safer Around Children & Pets

Registered-and Food Service Safe

Premiere® Ice Melter with CMA

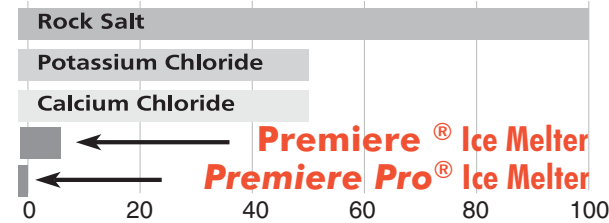

Melts to
-8°F/-22°C

- Patented Synergistic Formula
- Inhibits Metal Corrosion
- Will not Stain Carpets or Floors
- Will not Damage Shoes
- Colored for Controlled Application
- Contains Anti-Caking Agents
- Safer Around Children & Pets

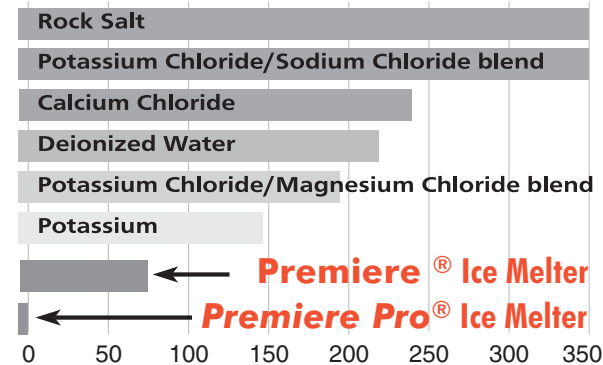

Registered-and Food Service Safe

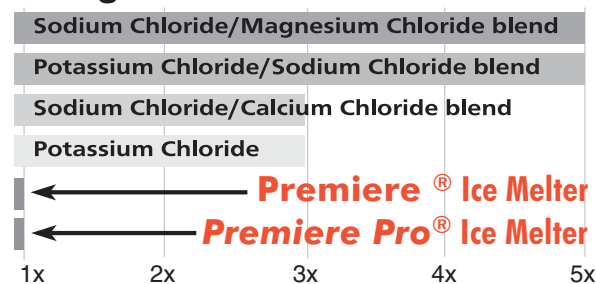

% More damaging to concrete

Corrosion testing on steel

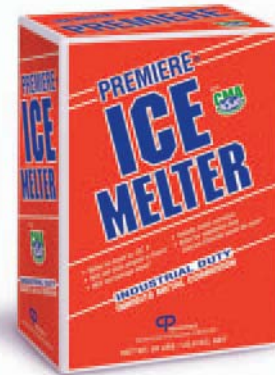

How many more times damaging to vegetation

Grainger Ice Melter Destroys ICE... Nothing Else.

Melts to
-8°F/-22°C

Melts to
-20°F/-29°C

- Patented Formula prevents corrosion
 - Seals concrete against damage
- Creates a brine solution to prevent thaw & refreeze cycles
- Will not damage carpets, flooring or leather
 - Will not harm vegetation
- Both are colored for controlled application

Registered-and Food Service Safe

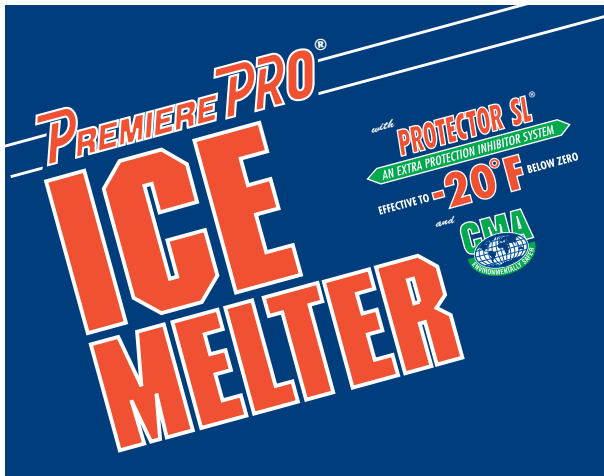

Questions?

Why should I use Premiere Pro® with Protector SL®?

It's important to remember that ice melters are primarily needed to prevent slip and fall accidents. *Premiere Pro*® Ice Melter with Protector SL® and CMA also provides safety for the surrounding infrastructure and costly assets. Its manufactured 10 ingredient synergistic inhibitor formula provides protection for concrete. It can be handled without gloves or protective clothing and is safe for vegetation.

What is Premiere Pro® with Protector SL®?

It's patented formulation developed in the lab that is virtually noncorrosive to metals, special alloys and concrete. This extra protection is effective on concrete, metal doors, railings, door tracks, dock plates, shopping carts, and electrical wires.

- **Premiere Pro® Ice Melter with Protector SL® and CMA** is a manufactured 10 ingredient formula developed to provide maximum protection for concrete. This synergistic inhibitor formula does not create heat but forms a brine solution to melt ice. It produces a chemical film that binds to and hardens concrete to prevent spalling.
- **Premiere Pro® Ice Melter with Protector SL® and CMA** is effective to -20°F/-29°C. A long-lasting brine solution quickly forms, preventing freeze-thaw-refreeze cycles and requiring less frequent application, saving you money in product and labor.

Premiere® Ice Melter with CMA

- **Premiere® Ice Melter with CMA** is a patented manufactured 9 ingredient formula developed to provide maximum protection for concrete. This synergistic inhibitor formula does not create heat but forms a brine solution to melt ice. It produces a chemical film that binds to and hardens concrete to prevent spalling.
- **Premiere® Ice Melter with CMA** is effective to -8°F/-22°C. A long-lasting brine solution quickly forms, preventing freeze-thaw-refreeze cycles and requiring less frequent application, saving you money in product and labor.

- **Premiere® Ice Melter with CMA** provides protection against metal corrosion.
- **Premiere® Ice Melter with CMA** With Its granular composition builds surface traction immediately.
- **Premiere® Ice Melter with CMA** is NSF* registered for use in food service application. Nontoxic and safer around children and pets.
- **Premiere® Ice Melter with CMA** will not leave oily residue, will not damage leather flooring or carpets.
- **Premiere® Ice Melter with CMA** has no shelf life. It won't clump or harden making it easy for you to apply.
- **Premiere® liquid Ice Melter with CMA** can be used to pre-treat before a storm.
