

Pond Saver®

Pond Saver® is a concentrated microbial product containing a minimum of 1 billion CFU's (colony forming units) per gram of a proprietary blend of bacteria that quickly biodegrade the nutrients, organic matter and hydrocarbons in water that contribute to sludge, clouding and foul odors. The bacteria in Pond Saver® are naturally-occurring strains that have NOT been genetically engineered. These bacteria were selected for their natural ability to quickly clean and deodorize nutrient-rich waters. Pond Saver® is a natural, biodegradable product and is nontoxic to plants, humans or animals, including fish. Pond Saver®:

- Improves water clarity and quality
- Reduces sludge and organic sediment buildup
- Controls sulfur odors

DIRECTIONS FOR USE

For Large Ponds: Apply 3 pounds of Pond Saver per acre-foot of water (325,000 gallon). Mix the product with pond water and pour into the shallow areas along the water's edge. Repeat application with a lower dose (1/2 pound per acre-foot) every 2 to 4 weeks as needed. Alternatively, drop Pond Saver WS water-soluble packs into the shallow water along the edge, spacing them apart equally. One packet handles about 54,000 gallons. Wait 2-weeks before evaluating.

For Small Ponds or Water Gardens: Apply 1 Tablespoon of Pond Saver per 1000 gallons of water. Repeat application every 2 weeks. For dirtier ponds, apply a double dose until water clears.

PROPER USE WITH ALGAEICIDES

If the pond is severely overpopulated with algae, correct this problem first before using Pond Saver, either by physically removing the surface algae, or by use of an EPA-registered algaecide. Note that chemical algaecides may kill or inhibit the Pond Saver bacteria. If an algaecide is used, allow adequate time for the algaecide levels to diminish (1 week in most cases) before applying Pond Saver. When applying Pond Saver after algaecide use, be sure to start with the higher initial application rate.

APPLICATION RATES

PURPOSE	PRODUCT	RATE	METHOD	FREQUENCY
Maintain clean, clear, odor-free water in Small Ornamental Ponds	Pond Saver® Granular	1 tablespoon per 1000 gallons	Disperse directly into pond water	Every two weeks
Maintain clean, clear, odor-free water in Small to Medium Size Ponds	Pond Saver® WS Paks	Initial Dose: 6 packs per 325,000 gallons Maintenance Dose: 1 pack per 325,000 gallons	Small Ponds: Toss pack directly into water Larger Ponds: Presoak as prescribed below	Apply maintenance dose every 2 weeks
Maintain clean, clear, odor-free water in Large Ponds/Lakes	Pond Saver® Granular	Initial Dose: 3 pounds per acre foot Maintenance Dose: 1/2 pounds per acre foot	Mix in a bucket of pond water, allow to soak for 2-4 hours, pour into pond along edges.	Apply maintenance dose every 2 weeks

BIOLOGICAL POND CLEANER AND CLARIFIER

CONTENTS

SAFE, NATURAL AQUATIC BACTERIA	
Minimum count.....	1 Billion cfu/g
INERT INGREDIENTS	
Ground Peanut Shells	

STORAGE/SHELF LIFE

This product is stable in cool, dry storage conditions. See expiration date on package.

HEALTH AND SAFETY INFORMATION

- In case of allergic reaction(s), treat symptoms and contact physician.
- Avoid breathing dust or spray mist.
- Wash hands after handling.
- In case of ingestion, seek medical attention.
- **Keep out of reach of children.**

PACKAGING

1/2-Lb water soluble bags, 6 per box or 50 per pail or bulk granular, 10-Lb box and 25-Lb pail
