## CYC-S6X

- A. Carrying handle    B. Nylon carrying belt    C. On/Off switch    D. Adjustable stand  
E. Recharging socket    F. Lens cover    G. Hanging hook

### Safety guidelines

- Keep out of reach of children.
- Do not use in wet conditions.
- Store in a clean, dry environment.
- Do not use if this unit is damaged in any way.
- Never short the terminals of the internal battery together.
- Never attempt to change the bulb when the battery is charging.
- Do not expose the battery to fire or high temperature, the battery may explode.
- Never look directly into the light.
- Caution! The lens will become hot after prolonged use.
- Do not attempt to disassemble battery or remove any parts from the battery terminals.
- Before disposing, protect exposed terminals.

### Battery disposal

The lead acid battery in this spotlight has normal service life for many years, when the battery does expire it should be removed from the spotlight for recycling. Please contact your local solid waste authority for recycling information.

### Charging the internal battery

1. The internal battery will need an initial charge of approximately 2 hours before first use.
2. The internal battery should only be charged with one of the accessories provided.
3. The on/off button (C) must be in the OFF position during the charging of the battery.
4. Avoid charging the internal battery at temperatures below 4°C or above 40°C.
5. The spotlight should be kept fully charged when not in use. If it is stored then it should be recharged every 3 months. Always ensure that the switch is in the OFF position when it is not in use.
6. If the charge is very low the battery will take approximately 6-8 hours to reach maximum capacity when using the supplied AC adaptor. However, a 4 - hour charge will provide ample amount of charge.
7. The battery can also be charged using your car's 12V DC socket with the supplied 12V DC charger. Do not charge for more than 3 hours as it will drain your car battery.

8. There is no indication that the battery is charging or is fully charged.
9. Do not charge continuously for more than 24 hours as this will cause damage to the battery.
10. It is advisable to recharge the spotlight after each use.
11. The battery charge does not have to be fully depleted before recharging.
12. Battery life span: the more it is used, the longer the battery will last. Under normal usage, the battery is good for 450 charging cycles.

#### **Changing the halogen bulb**

To replace the halogen bulb, unscrew the lens cover (F) in counter clockwise direction. Remove the lens and pull out the reflective cone. Disconnect the bulb wire and unclip the spring clip. Bulb is now able to be removed and replace with the new bulb.

**WARNING:** Do not touch the bulb with your finger directly. Always handle the bulb by it's base only.

#### **Using the spotlight**

To operate the spotlight, press the on/off switch (A). Under optimum condition, a fully charged battery will provide approximately 30-40 minutes of burn time.

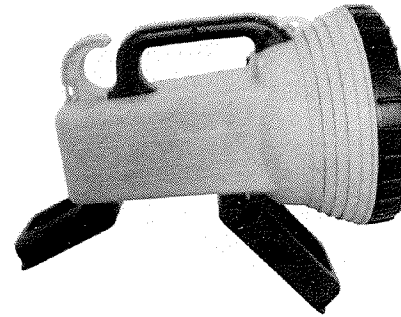

#### **Warranty**

Your Cyclops product is covered by a One Year Limited Warranty on parts and labor from the date of original purchase, and purchases must be made through an authorized dealer. The warranty covers defects in workmanship and materials. The warranty does not apply to units which have been damaged or abused intentionally or unintentionally. Purchases from individuals or unauthorized internet sites voids the warranty.

Tampering with or altering the unit will void the warranty. Any unauthorized service will void warranty. Original sales receipt must be produced for any warranty service and a return authorization must be obtained from customer service at 877-269-8490 prior to returning product.
