

## PIRIT™ UTILITY LINE USER INSTRUCTIONS

- Use only with a UL approved GFCI outlet.
- Before using this hose make sure the washer is placed inside the female coupling.
- Thaw time of your hose will vary depending on outdoor temperature and amount of ice build-up inside of hose.
- Do not leave hose under pressure when not in use.
- Do not leave attachments on hose when not in use.
- When using for radiant heat applications, there is no need for water in the line.
- This hose is NOT designed to provide freeze protection to your water supply, be sure to take appropriate measures to protect your water supply.
- Do not leave attachments on hose when not in use.
- Drain hose when not in use to extend the life of your hose.
- Constructed with FDA approved materials for potable water.
- Do not leave hose coiled or spooled for more than 30 minutes when plugged in.
- Use caution: This is an appliance and should be treated and respected as such.
- Always unplug Utility Line when not in use.

**The PIRIT™ Utility Line is designed for the consumer that wants to run water in cold weather, but does not need to maintain a water line 24/7. The PIRIT™ Utility Line can be plugged in and out and allowed to freeze and thaw to suit the consumers wants and needs.**

### Some uses for the PIRIT™ Utility Line include:

- Equine
- Livestock
- Job site
- Backyard hockey rink
- Jacuzzi/Hot tub
- Military
- Masonry
- Wash down

### Due to the radiant heat qualities of the PIRIT™ Utility Line, other consumer uses include:

- Gardening
- Green house
- Frost protection
- Small space heat
- Ice melt
