Unpack the carton and check for the following hardware:

SRWM-180 Swivel Reel Wall Mount Parts

- One (1) Reel Crank Handle
- One (1) Reel Assembly
- One (1) Wall Mount Bar
- Two (2) ¼" x 3 ½" Lag Screws
- Two (2) ¼" x 2 ½" Lag Screws
- Four (4) ¼" Washers

Assembly Instructions

Note: The Wall Mount Swivel Reel is designed to mount to wall studs spaced at 16 inches on center.

- 1) Locate the wall studs use the Wall Mount Bar as a template and mark the wall with 4 pilot hole location. Use a 1/8 drill bit to make the pilot holes.
- 2) Install the 2 long Lag Screws w/Washers through the top of the Wall Mount Bar and 2 short Lag Screws w/Washers through the bottom mounting flanges and tighten to the wall.
- 3) Slide the Swivel Pin through Swivel Pin Receiver.

Note: The Swivel Reel design allows the Reel Assembly and hose to easily be removed and stored for the winter season.
