REACTIVITY

Stability: Stable. Conditions to avoid: Do not combine with strong oxidizing agents. Polymerization: Will not occur. Hazardous Decomposition products: None other than ordinary products of combustion.

HEALTH HAZARDS

Accidental eye contact is very unlikely since product's active component is a non-flowing, pressure sensitive adhesive. It is a chemically and environmentally stable adhesive. Nevertheless, eye contact should be avoided, and if it does occur then a physician should be consulted immediately.

FIRST AID PROCEDURES

Skin Contact: Remove from skin with a mild hydrocarbon solvent such, as mineral spirits (paint thinner). Then further clean skin with soap and water. Alternate method: Hand or body lotion or creme will also safely remove the adhesive from skin or other surfaces.

Eye Contact: Call a physician immediately if eye contact is accidentally made.

CARCINOGENICITY LISTINGS: None

SAFE HANDLING & USE

Spill or leak procedure: Remove sources of ignition. Sweep up debris and place in waste disposal container.

Waste disposal: Disposal must be made in accordance with applicable governmental regulations.

The information contained in this Material Safety Data Sheet is based on the best available data. Normal prudence and caution need to be employed in product use.
